## **PANTEGO WATER UTILITIES** **CUSTOMER SERVICE AGREEMENT**

1. **PURPOSE** – The Pantego Water Utility is responsible for protecting the drinking water supply from contamination or pollution that could result from improper plumbing practices. The purpose of this service agreement is to notify each customer of the plumbing restrictions that are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before the **PANTEGO WATER UTILITY** will begin service. In addition, when service to an existing connection has been suspended or terminated, the water system won't re-establish service unless it has a signed copy of this agreement.
  
2. **PLUMBING RESTRICTIONS** – The following undesirable plumbing practices are prohibited by state regulations.
  - No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
  - No cross-connection between the public drinking water supply and a private water system permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone prevention device.
  - No connection that allows condensing, cooling, or industrial process water to be returned to the drinking water supply permitted.
  - No pipe or pipe fitting which contains more than 8.0% lead may be used for the installation or repair of plumbing at any connection that provides water for human use.
  - No solder or flux that contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection that provides water for human use.
  
3. **SERVICE AGREEMENT** – The following are the terms of the service agreement between the **Town of Pantego Water Utility** and \_\_\_\_\_ (the Customer).
  - The water system will maintain a copy of this agreement as long as the customer and/or premises are connected to the water system.
  - The customer shall allow his property to be inspected for possible cross-connections and other undesirable plumbing practices. These inspections shall be conducted by the water system or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the water system's normal business hours.
  - The water system shall notify the customer in writing of any cross-connection or other undesirable plumbing practice that has been identified during the initial inspection or the periodic re-inspection.
  - The customer shall immediately correct any undesirable plumbing practice on their premises.
  - The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the water system. Copies of all testing and maintenance records shall be provided to the water system.
  
4. **ENFORCEMENT** – If the customer fails to comply with the terms of the service agreement, the water system shall, at its option, either terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the customer.
